PROFILE

Age: 25

Address: Campinas, SP – Brazil

I am attending graduate school in System Analysis and Development.

Currently working at Daitan Group as a Java Intern Developer.

Hard Skills

Java:

OOP, Spring Boot, unit and integration tests. Rest API development.

Python:

Small experience with Django and Flask API development.

Git:

I currently work with Gitlab, and I host all my projects on GitHub.

Soft Skills

I think I have great logical thinking, and I'm experienced with team management and use of agile methodologies in interior design project delivery. I'm naturally curious, and really want to learn new things all the time.

Languages

English:

EFSET C2 Proficient (76/100)

Listening and conversation.

Portuguese:

Fluent.

EXPERIENCE

Student

With Java, I have implemented a Hash Table, with collision solved by chaining. Also developed a simple Job Finder API with Spring Boot. Also implemented 6 of the most used design patterns for studies purpose.

With Python, I implemented some simple algorithms such as Bubble Sort, recursive and non-recursive Fibonacci, Coin Change Possibilities. Also wrote an algorithm that finds all the edging tapes of a furniture project on the database and calculates its price and quantity. It's a personal project I'm working on, due to I was an Interior Designer.

All these projects are available on my GitHub and Replit, at @VictorHugoLeme/Studies

Shallow dive on HTML/CSS/JS with some small jsfiddle.net projects. You can find me as VictorHugoLeme
